

GARDENO Mobile Work Platform

Instructions for use & safety instructions

→ Please read these recommendations before using the work platform

- Check the work platform has been properly assembled and that the stabilisers are properly seated on flat, stable ground.
COMMENT : If the ground is soft, we recommend placing a plank under each stabiliser.
- Do not use the work platform on sloping ground.
- Only one person at a time to climb on the work platform.
- Always climb onto the work platform by means of the ladder on the side opposite to the wheels.
- Never move the work platform when there is a person or tools on its platform.
- Never lean out over the handrails nor beyond the vertical axis of the ladders.
- Do not subject the work platform to continual bad weather conditions and never leave it out in the rain.
- When storing the work platform after it has been dismantled, refit the steel pins onto the uprights or railings, and the bolts + nuts XY onto the rear section to prevent them from being mislaid.
- **Maximum tyre pressure : 1.3 bar.**
- **Maximum loading capacity : 200 kg / 31 stone.**

Please see right side for an assembly diagram
