

Heavy Duty Moulded Safety Steps

With a load bearing of 260kg and wall thicknesses of 10mm, these Heavy Duty Steps are robust, hardwearing and virtually indestructible! Manufactured from medium density polyethylene, these Heavy Duty Steps are suitable for use in a vast array of environments including factories, warehouses, storerooms, schools and hospitals. They are resistant to most chemicals, suited to wash down applications and wet/corrosive environments and are approved for food production facilities.

Our range of Heavy Duty Steps are easy to handle due to the hand holes routed out on either side. Each step is also fitted with abrasive strips for sure footing. For use on polished floors, we can fit rubber feet to the underside for added stability. The four Step is also available with a powder coated steel handrail to give the user added safety.

CODE	EXTERNAL DIMENSIONS AT TOP	MAX LOAD	WEIGHT	WALL	TEMP RANGE
RW0101	490 x 310 x 300	260kg	5kg	10mm	-20 to +60 degrees celsius
RW0102	500 x 545 x 415	260kg	10kg	10mm	-20 to +60 degrees celsius
RW0103	500 x 790 x 620	260kg	15kg	10mm	-20 to +60 degrees celsius
RW0104	490 x 1070 x 820	260kg	20kg	10mm	-20 to +60 degrees celsius
RW0104HR	490 x 1070 x 1620	260kg	25kg	10mm	-20 to +60 degrees celsius
